

## Custom Cloacker Instructions

- Upload these files to public folder
  - index.php (replace with existing one)
  - money-page.php
  - request-check.php
  - loading\_2.gif
- Create an empty **logs** folder inside public directory
- Complete fingerprint DNS process for Web Javascript and they will give two variables/script and you need to paste on line number **151 & 154** on request-check.php.
